

# Titanium Nozzle / Needle

Offer Optimal product for your instrument

**Feature**

**Higher chemical resistance\* and puncture resistance\* than SUS316**  
\*β-Titanium

**Available  
Small lot size**

**Offer from 1 piece trial order to quantity production**

## ■ Feature

### Available types

- **Titanium Gr 2** : Higher chemical resistance
- **β-Titanium** : Higher chemical resistance + puncture resistance
  
- No Fe elution. Used for magnetic particle.
- Ask for detailed available sizes.

### Available Processing (self-manufacture)

- Bending, Taper processing, Sharpening tip, Laser welder etc.

### Inner surface roughness

- Available Ra 0.05 or less
- Great improvement for better wall resistance, washing performance and precision injection

◆ Product specifications are subject to change without prior notice for improvement.
